This book suggests that religion, in its usual sense, can be replaced by something better, that the human spirit or subjectivity can be the subject of scientific study and that lack of purpose or design in the universe is not a handicap but a positive opportunity for intelligent beings to make of the universe and its contents what they reasonably can. The book breaks new ground in suggesting a

radical alternative to religion. It offers a scientific and humanist alternative to religion which appeals to people's critical faculties rather than emotions or intuitions. It also challenges current views of causation and the principle of sufficient reason by stressing the subjectivity of our reasoning powers and clarifying these in relation to an independent external reality. It develops and elaborates a notion of the 'noosphere' within a theoretical system, this enables the notion to assume a scientific

Philosophy of Physical Activity Education (Including Educational Sport) is designed to help you develop an early philosophic perspective of physical activity education, including educational sport. In the process you will also come to understand selected aspects of the field's historical background as a developing academic field and discipline. The field is called sport and physical education in the United States currently. However, as we move along in the 21st century, it is still designated as

Despite its obvious importance, there has been a gradual decline of physical activity education philosophy, including educational sport, within the professional curricula of physical activity educators and coaches. This appears to have taken place since the adoption in the 1970s of an almost pure analytic philosophical approach to the detriment of almost any applied philosophic endeavor. As you develop an understanding about your chosen life work, the author hopes
